Daily Report — Portfolio Update & Deployment

Date: 2025-10-02
Task: Update Portfolio and Deploy via InfinityFree

Name: Muhammad Atif Javed

Link Of Live Website: https://atif-khattak.wuaze.com

1. Objective

To enhance the personal portfolio's design, responsiveness, and user experience, and deploy it live using InfinityFree hosting.

2. Activities Completed

- Updated portfolio HTML structure for a modern, professional layout.
- Applied **Bootstrap** framework for responsiveness across devices.
- Added **custom CSS** for a unique, polished appearance.
- Integrated **JavaScript** to enhance smoothness and interactivity.
- Verified and adjusted internal navigation links to prevent broken pages.
- Uploaded updated files using **InfinityFree hosting method**:
    1. Logged into InfinityFree control panel.
    2. Opened **File Manager**.
    3. Navigated to the `htdocs` directory.
    4. Uploaded all updated portfolio files, maintaining the folder structure.
    5. Renamed the landing page file to `index.html` to ensure it loads by default.
- Tested site on multiple devices and browsers, including Incognito mode, to confirm correct loading and responsiveness.

3. Outcome

- Updated portfolio is now live at: **https://atif-khattak.wuaze.com**
- Fully **responsive** design using Bootstrap and custom CSS.
- Smooth animations and transitions powered by JavaScript.
- Clean navigation and modern UI for improved user experience.

4. Challenges & Solutions

- **Issue:** Browser caching showed old version of site.
  Solution: Cleared browser cache and tested in Incognito mode to confirm latest version.
- **Issue:** Minor navigation issues during upload.
  Solution: Corrected file paths and naming conventions to match exactly.
